REQUEST FOR PROPOSAL

BID NO. 21-016

FOR

TRAFFIC SIGNAL PREVENTIVE MAINTENANCE AND REPAIR SERVICES

INFORMATIONAL ADDENDUM NO. 2

DATED ISSUED: July 26, 2021

- 1. On the bid schedule for items A & B, could you please confirm if the unit cost should be multiplied by 4 since the semi-annual and annual would be conducted during the quarterly maintenances? Or include a line on their showing how you would like the total cost calculated?**
Yes, the unit cost should be multiplied by four (4) as the quarterly billed invoices will capture the cost of the quarterly and semi-annual costs. The 320 Signal Inspections is the number of signals within the City.
- 2. On Section “B” of the bid schedule, is the hourly rate the same as the total cost or is there a budgeted amount of hours that we need to multiple as in section “C”?**
The hourly rate will be the same as the total cost as there is not a budgeted amount.
- 3. In section “C” there is also not a line item for signal maintenance supervisor OT. Will an addendum be issued adding a price line item for that?**
Addendum is listed below with the added changes highlighted.
- 4. Could you please clarify what would be the difference between a signal maintenance technician and a traffic signal maintenance technician?**
All companies have different job titles for their staff, if your company does not have both please specify on a separate sheet and list as addendum specifying which section it applies to.
- 5. Is there an estimated number of hours for the service bucket truck and hydraulic crane truck in section “D” like there is in section “C” or will the hourly rate be the same as the total cost?**
Hourly rate will be the same as the total cost.
