

"Quality Service Through Teamwork"

STORM-RELATED PROBLEMS AND FLOOD PREVENTION

The City of Turlock provides several proactive and reactive methods of dealing with storm related problems such as flooding, water storage and contingency planning.

Storm related issues can range from mere inconvenience, while others pose serious threats to safety or property. If flooding occurs on City streets, you may clean debris from the grating but please DO NOT remove storm grates or manhole covers, as doing so will

create safety and security problems.

If you have a storm related problem, you can contact Municipal Services at 668-5590. To report problems after normal business hours or on holidays, please call Police Services at 668-1200.

SANDBAGS

As a service to citizens, the City of Turlock Municipal Services Department operates a sandbag pickup operation. Turlock residents can pick-up sandbags for use during storm events to prevent damage and

flooding on their property, however the City of Turlock does not deliver sandbags to customer's homes. There is no charge for the sandbags, but disposal becomes the responsibility of the citizen.

Sandbags can be picked up at 901 S. Walnut Road, Turlock. Pick-up is available between the hours of 8:00AM and 4:00PM Monday through Friday. Hours may be extended and additional sand bag pickup locations may be added if demand is high.

6 FACT ABOUT CARLOS!

INTERESTING FACT ABOUT CARLOS:

Carlos served eight years in the United States Navy. He also coaches baseball at Pitman High School as well as a girls travel softball team.

QUOTE FROM CARLOS:

"The only easy day was yesterday"

WATERING LIMITED TO ONE (1) DAY PER WEEK

The City's current watering schedule limits watering to one (1) day per week only. Addresses that end with an ODD number may water on Sunday and addresses ending in an EVEN number may water on Saturday (see image on right). Watering is prohibited from 9:00am to 7:00pm daily. For more information on the City's watering schedule, call Municipal Services at (209) 668-5590 or email municipalservices@turlock.ca.us.

THE IMPORTANCE OF BACKFLOW PREVENTION

The Municipal Services Department is committed to protecting the public potable water supply from potential contamination or pollution due to the backflow or back-siphonage of contaminants or pollutants through a water

service connection. Backflow prevention assemblies provide the necessary protection from potential hazards.

A backflow preventer is a device that's installed on your home's water pipes that allows water to flow in one direction but never in the opposite direction. Its sole job is to prevent drinking water from being contaminated due to backflow.

The City's website now provides helpful information on

backflow prevention, the City's required installation standard, and a listing of persons certified to check backflow prevention devices within the City of Turlock.

For more information on backflow prevention, or to learn more about becoming a certified tester, visit the City's website at www.CityofTurlock.org and search with keywords "backflow prevention".

UH-OH...

Have you received a water wasting or excessive water use penalty fine in the last 60 days? Save yourself penalty fees by electing to take the City's online water conservation course.
